

SHINGLER
CONSTRUCTION

strong roots, firm foundations

Shingler Construction Ltd has been launched to provide a high quality, efficient contracting service to both public and private sector clients. The business shares its ownership, ethos and construction industry background with Shingler Homes Ltd, one of Shropshire's best known and most respected housebuilders.

With over 25 years in Construction behind them Shingler's directors and their highly skilled workforce are totally committed to cost effective and high value building solutions, through from design to completion.

The Shingler Construction management team has a broad knowledge and experience of diverse sectors – including civil engineering, residential, refurbishment, public, leisure and retail projects. Quite simply we are prepared for practically any kind of construction project.

Our whole team is involved in every detail of every project we do. This ensures you have the kind of support and information you need to make informed decisions right from the start. Our team ownership, our Director's hands on approach; it's what gives our competitive edge; it's what makes us different.

Great people, focused support

"From the Directors of the Company to our site operatives, we believe the success of our business and the quality of our product, is dependant on the people we employ. That's why we invest heavily in training and developing our workforce as well as our management systems, to ensure our employees not only have the appropriate qualifications, but also are managed in the correct way to ensure job satisfaction and long-term career development.

We expect the same levels of commitment and service from our supply chain, so you can be assured that everyone working on your project will be fully aware of their roles and responsibilities and will be totally focused on delivering ALL of your project requirements"

Jeremy Shingler,
Managing Director

Guiding principles, lasting values

Shingler Construction delivers exceptional levels of service by:

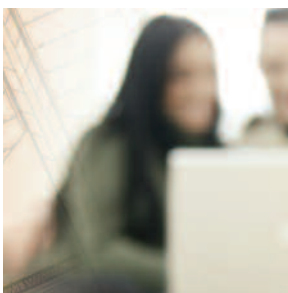

- Working closely with clients from project conception to completion and understanding exactly what they need
- Making quality of workmanship a paramount consideration
- Providing safe working environments for employees, clients and visitors
- Managing projects professionally, providing regular reporting systems to ensure no detail is overlooked
- Delivering on-time
- Recognising budgets and working within them
- Embracing new technology and modern methods of construction
- Only using skilled, trusted labour, all with appropriate construction skills and qualifications
- Constantly updating our waste management strategies and building methods to ensure all of our projects are as environmentally friendly as possible
